Washington, DC – On July 19, 2012, Congressman Steve Rothman (NJ-9), was thanked by Joel Bloom, President of New Jersey Institute of Technology (NJIT), for his leadership in advocating for higher education and in particular two key grant proposals for NJIT. Congressman Rothman is a strong supporter of NJIT's “Health Information Technology Proof of Concept Center” and “NJ Solar Connection” proposals. The Health Information Technology Proof of Concept Center will allow new and transformative ideas for modernizing healthcare technology to be examined and evaluated and the NJ Solar Connection project will work towards creating greater access to solar energy and would create over 1,000 jobs in New Jersey.
