### Statement on the President's State of the Union Address

Congressman Steve Rothman's statement on President George W. Bush's seventh State of the Union address follows:

"The President's tragic mistake with regard to Iraq policy overshadows his entire speech. He continues to escalate the Iraq War against the will of the vast majority of Americans, the Congress, and U.S. Generals. Regarding his health insurance proposal, the President simply replaces the present regressive, flawed tax deduction with another. Instead, we need single payer, universal health care now."
